pfSense IP Address = 10.17.1.254
pfSense hostname = ironcurtain

*Individual IP blocking is permitted, but cannot block subnets.
Our IP Infrastructure: **10.X.1.1-6, 192.168.X.1-4**

Steps After Logon:
1. Create a new password to replace the default *pfSense* one.
2. Check for Updates, and update if necessary.
3. In System/Advanced/Admin Access, make sure that the protocol is HTTPS, Enable webConfigurator redirect rule, HSTS is enabled, Disable login autocomplete, Disable Roaming, and the console is password protected.
4. Check Port Forwarding Rules (Firewall/NAT/Port Forward) to ensure that only the required ports are being used. (Reference This).
5. Set up some sort of pfsense logging script?
